

Plants

I can describe what a plant needs to help it grow.

sunlight	All plants need light from the sun to grow well. Some plants need lots of sunlight . Some plants only need a little sunlight .
water	All plants need water to grow. Without water , seeds and bulbs will not germinate .
temperature	Temperature is how warm or cold something or somewhere is. Some plants like cooler temperatures and some like warmer temperatures .
nutrition	Food or nourishment. Plants make their own food in their leaves using sunlight .

Key Words	Meaning
Temperature	How warm or cold something or somewhere is
Nutrients	We get nutrients from food. A plant makes its own food so creates its own nutrients.
Germination	When the conditions are right, the seed will soak up water and swell and a tiny new plant will burst out of its shell. This is called germination
Healthy	In a good condition.
Reproduction	When more plants are made, it is called reproduction
Trunk	The thick main stem of the tree
Roots	The part of the plant that is hidden underground that holds it up and takes water and food from the soil.
Stem	It keeps the plant upright and carries water
Bulbs	A plant bud that begins to grow underground
