

## Year 2 – Mathematics Intent

| Block | Topic  | Term | Number of Weeks     | Retrieval Focus |
|-------|--|------|---------------------|-----------------|
| 1     | <a href="#">Number and Place Value</a>                                   |      | Estimated – 6 weeks |                 |
| 2     | <a href="#">Addition and Subtraction</a>                                 |      | Estimated – 9 weeks |                 |
| 3     | <a href="#">Money</a>  |      | Estimated – 2 weeks |                 |
| 4     | <a href="#">Multiplication and Division</a>                              |      | Estimated – 6 weeks |                 |
| 5     | <a href="#">Fractions</a>  |      | Estimated – 3 weeks |                 |
| 6     | <a href="#">Geometry – Properties of Shape</a>                           |      | Estimated – 2 weeks |                 |
| 7     | <a href="#">Measure – Time</a>   |      | Estimated – 2 weeks |                 |
| 8     | <a href="#">Statistics</a>   |      | Estimated – 2 weeks |                 |
| 9     | <a href="#">Geometry – Position and Direction</a>                        |      | Estimated – 1 weeks |                 |
| 10    | <a href="#">Measure – Length, Height, Mass, Capacity and Temperature</a> |      | Estimated – 4 weeks |                 |

## Year 2 – Mathematics Intent

| Block 1   |  |   |  |
|---|--|---|--|
| Number and Place Value  |  |   |  |
| Substantive Knowledge<br>National Curriculum  | Ready to Progress<br>Expected TAF Statements   | Key Performance Indicators  | Sequence of learning<br>Detailed in Planning Overview  |
| Count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward.            |  | <ul style="list-style-type: none"> <li>• Can count forwards and backwards in 2s from 0 and any number</li> <li>• Can count forwards and backwards in 5s from 0 and any multiple</li> <li>• Can count forwards and backwards in 3s from 0 any multiple</li> <li>• Can count forwards and backwards in 10s from any number</li> </ul> | <ul style="list-style-type: none"> <li>*Count, read and write numbers to 100</li> <li>*Recognise Place Value in a 2-digit number</li> <li>*Examine patterns using Place Value &amp; counting in steps of 10</li> <li>*Compare and order numbers</li> </ul> |
| Recognise the place value of each digit in a two-digit number (tens, ones)                          | <p>2NPV-1 Recognise the place value of each digit in two-digit numbers, and compose and decompose two-digit numbers using standard and non-standard partitioning.</p> <p>TAF - Partition any two-digit number into different combinations of tens and ones, explaining their thinking verbally, in pictures or using apparatus</p> | <ul style="list-style-type: none"> <li>• Can partition a 2-digit number into tens and ones using structured resources to support them</li> <li>• Can identify the number of tens and ones in a written 2-digit numbers without structured resources</li> </ul>  | <ul style="list-style-type: none"> <li>*Identify and positions numbers on marked and blank number lines</li> <li>*Partition numbers into different combinations of tens and ones</li> <li>*Counting in steps of 2, 5 and 3</li> </ul>                      |
| Identify, represent and estimate numbers using different representations, including the number line | <p>2NPV-2 Reason about the location of any two-digit number in the linear number system, including identifying the previous and next multiple of 10.</p> <p>TAF - Read scales* in divisions of ones, twos, fives and tens</p>  | <ul style="list-style-type: none"> <li>• Can position 2-digit numbers on a marked number line and reason about where they are positioned</li> </ul>   | <p>(Reflect on which elements of counting in different multiples to cover now and which to cover in Multiplication and Division Block)</p>   |
| Compare and order numbers from 0 up to 100; use <, > and = signs                                    |  | <ul style="list-style-type: none"> <li>• Can create 2-digit numbers using concrete equipment and use to compare by reasoning about the size of numbers</li> </ul>   |  |

## Year 2 – Mathematics Intent

|   |  |  |  |
|---|--|--|--|
|   |  | <ul style="list-style-type: none"><li>• Can compare numbers by identifying their relative positions in the linear number system (number line)</li><li>• Can position the <math>&lt;</math>, <math>&gt;</math> and <math>=</math> signs correctly between two 2-digit numbers</li></ul> |  |
| Read and write numbers to at least 100 in numerals and in words |  | <ul style="list-style-type: none"><li>• Can read numbers from 1 – 100 in numerals</li><li>• Can write numbers from 1 – 100 in words</li></ul>  |  |
| Use place value and number facts to solve problems.             |  | <ul style="list-style-type: none"><li>• Can use coins to make given amounts of money, applying place value</li><li>• Can solve problems linked to place value</li></ul>  |  |

## Year 2 – Mathematics Intent

| Block 2   |   |  |  |
|---|---|--|--|
| Addition and Subtraction  |   |  |  |
| Substantive Knowledge   | Ready to Progress   | Key Performance Indicators   | Sequence of learning Detailed in Planning Overview   |
| National Curriculum   | Expected TAF Statements   |  |  |
| Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100  | <p>2NF–1 Secure fluency in addition and subtraction facts within 10, through continued practice.</p> <p>TAF – Recall all number bonds to and within 10 and use these to reason with and calculate bonds to and within 20, recognising other associated additive relationships (e.g. If <math>7 + 3 = 10</math>, then <math>17 + 3 = 20</math>; if <math>7 - 3 = 4</math>, then <math>17 - 3 = 14</math>; leading to if <math>14 + 3 = 17</math>, then <math>3 + 14 = 17</math>, <math>17 - 14 = 3</math> and <math>17 - 3 = 14</math>)</p>  | <ul style="list-style-type: none"> <li>• Can relate number facts to 10 to adding and subtracting multiples of 10 within 100</li> <li>• Can recall and use addition and subtraction facts to 20 fluently; derive and use related facts to 100</li> <li>• Can solve missing box and missing symbol calculations</li> </ul>   | <p>*Add and subtract within 10</p> <p>*Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot</p>  |
| <p>Add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> <li>• A two-digit number and ones</li> <li>• A two-digit number and tens</li> <li>• Two two-digit numbers</li> <li>• Adding three one-digit numbers</li> </ul> | <p>2AS–1 Add and subtract across 10</p> <p>2AS–3 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract only ones or only tens to/from a two-digit number.</p> <p>2AS–4 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract any 2 two-digit numbers.</p> <p>2AS–2 Recognise the subtraction structure of ‘difference’ and answer questions of the form, “How many more...?”.</p> <p>TAF – Add and subtract any 2 two-digit numbers using an efficient strategy, explaining their method verbally, in pictures or using apparatus (e.g. <math>48 + 35</math>; <math>72 - 17</math>)</p> | <ul style="list-style-type: none"> <li>• Can add and subtract numbers mentally, including: <ul style="list-style-type: none"> <li>○ a 2-digit number and 1s</li> <li>○ a 2-digit number and 10s</li> <li>○ 2 simple, 2-digit numbers, which do not involve bridging a 10</li> <li>○ adding 3 single-digit numbers</li> </ul> </li> <li>• Can add and subtract two 2-digit numbers that bridge a multiple of 10 using jottings or a series of related number sentences to avoid overload of working memory</li> <li>• Can use concrete apparatus or pictorial representations to demonstrate how they have calculated an answer.</li> </ul> | <p>* Understand that equations need to be balanced and an equation can have an expression on both sides.</p> <p>*Compare expressions with <math>&gt;</math> <math>&lt;</math> and <math>=</math> symbols</p> <p>* Recognise the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems</p> <p>*Recall and use addition and subtractions facts within and to 20</p> |

## Year 2 – Mathematics Intent

|  |   |  |   |
|--|---|--|---|
| <p>Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot</p>  | <p>TAF – Recall all number bonds to and within 10 and use these to reason with and calculate bonds to and within 20, recognising other associated additive relationships (e.g. If <math>7 + 3 = 10</math>, then <math>17 + 3 = 20</math>; if <math>7 - 3 = 4</math>, then <math>17 - 3 = 14</math>; leading to if <math>14 + 3 = 17</math>, then <math>3 + 14 = 17</math>, <math>17 - 14 = 3</math> and <math>17 - 3 = 14</math>)</p> | <ul style="list-style-type: none"> <li>• Can show that addition can be done in any order (commutative)</li> <li>• Can show that subtraction can't be done in any order</li> </ul>  | <ul style="list-style-type: none"> <li>*Derive and use addition and subtraction facts to 100</li> <li>*Consolidate adding two 1-digit numbers crossing the tens boundary</li> <li>*Consolidate subtracting a 1-digit number from a teen number crossing the tens boundary</li> <li>*Adding three 1-digit numbers (odd &amp; even)</li> <li>*Add a 2-digit number and ones</li> <li>*Add a 2-digit number and tens</li> </ul>                  |
| <p>Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.</p>   |   | <ul style="list-style-type: none"> <li>• Can recognise and use the inverse relationship between addition and subtraction</li> <li>• Can check calculations using the inverse operation</li> </ul>  | <ul style="list-style-type: none"> <li>*Add two 2-digit numbers (no bridging, with bridging, adjusting &amp; compensating)</li> <li>*Subtract a 1-digit number from a 2-digit number</li> <li>* Subtract tens from a 2-digit number</li> <li>* Subtract two 2-digit numbers (no bridging, bridging, adjusting &amp; compensating)</li> <li>*Use finding the difference to solve comparative problems</li> <li>*Solve word problems</li> </ul> |
| <p>Solve problems with addition and subtraction:</p> <p>Using concrete objects and pictorial representations, including those involving numbers, quantities and measures applying their increasing knowledge of mental and written methods</p> |   | <ul style="list-style-type: none"> <li>• Solve one-step addition problems using mental strategies</li> <li>• Solve one-step subtraction problems using mental strategies</li> <li>• Solve one-step addition problems using a written method in line with school calculation policy e.g. counting on a number line, partitioning</li> <li>• Solve one-step subtraction problems using a written method in line with school calculation policy e.g. counting back on a number line, partitioning</li> <li>• Understand when a word problem involves addition or subtraction</li> </ul> |   |

Year 2 – Mathematics Intent

| Block 3  |  |  |  |
|--|--|--|--|
| Money  |  |  |  |
| Substantive Knowledge  | Ready to Progress  | Key Performance Indicators   | Sequence of learning   |
| National Curriculum  | Expected TAF Statements  |  | Detailed in Planning Overview  |
| Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value                                 | <p>No specific Ready to Progress statements for Money but use the opportunity to consolidate prior statements as appropriate e.g 2NPV-1 Recognise the place value of each digit in two-digit numbers, and compose and decompose two-digit numbers using standard and non-standard partitioning.</p> <p>2AS-1 Add and subtract across 10. 2AS-2 Recognise the subtraction structure of 'difference' and answer questions of the form, "How many more...?".</p> <p>TAF - Use different coins to make the same amount</p> | <ul style="list-style-type: none"> <li>• Can record using symbols £ and p (separately, depending on the unit being used)</li> <li>• Can add together different coins and find the total</li> </ul> <p>Can find coins that make a particular amount e.g. <i>Which coins could you use to make 20p?</i></p>  | <p>*Recognise coins and notes (recap year 1)</p> <p>* Combine amounts to make a particular value</p> <p>* Find total value of groups of coins and notes and record using symbols £ and p (separately, depending on the unit being used)</p> <p>* Find different combinations of coins that equal the same amount of money</p> <p>* Solve simple problems in a practical context involving addition of money</p> <p>* Solve simple problems in a practical context involving change</p> <p>* Solve simple problems in a practical context involving subtraction of money (other than change)</p> <p>*Consolidation, reasoning and problem solving</p> |
| Find different combinations of coins that equal the same amounts of money  |  | <ul style="list-style-type: none"> <li>• Can say how many different combinations of coins can you use to make a given total e.g. 20p</li> </ul>  |  |
| Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change |  | <ul style="list-style-type: none"> <li>• Can find totals of different amounts of money</li> <li>• Can decide which coins could be used to pay for the total</li> <li>• Can solve subtraction problems such as <i>Jess has saved 62p. She spends 15p. How much does she have left?</i></li> <li>• Can find change from a given amount e.g. <i>Jess buys a banana for 23p. She pays for it using a 50p. How much change does she get?</i></li> </ul> |  |

## Year 2 – Mathematics Intent

| Block 4   |  |   |   |
|---|--|---|---|
| Multiplication and Division   |  |   |   |
| Substantive Knowledge<br>National Curriculum  | Ready to Progress<br>Expected TAF Statements   | Key Performance Indicators  | Sequence of learning<br>Detailed in Planning Overview   |
| Count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward   |  | <ul style="list-style-type: none"> <li>• Can count forwards and backwards in 2s from 0 and any number</li> <li>• Can count forwards and backwards in 5s from 0 and any multiple</li> <li>• Can count forwards and backwards in 3s from 0 any multiple</li> <li>• Can count forwards and backwards in 10s from any number</li> </ul> | <ul style="list-style-type: none"> <li>*Understand and use the language of equal groups</li> <li>*Link equal groups to repeated addition</li> <li>*Link equal groups to multiplication sentences with x symbol</li> <li>*Recall and use multiplication facts from the 2x table</li> </ul>   |
| Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers  | TAF – Recall multiplication and division facts for 2, 5 and 10 and use them to solve simple problems, demonstrating an understanding of commutativity as necessary   | <ul style="list-style-type: none"> <li>• Can use concrete objects to show understanding of multiplication</li> <li>• Can recall the 10x table in a random order</li> <li>• Can recall the 2x table in a random order</li> <li>• Can recall the 5x table in a random order</li> <li>• Can recognise odd and even numbers</li> </ul>  | <ul style="list-style-type: none"> <li>*Recall and use multiplication facts from the 10x table</li> <li>*Recall and use multiplication facts from the 5x table</li> <li>*Recall and link facts from the 2x, 5x and 10x tables and reason about patterns between times table facts</li> <li>*Introduce arrays and the new term 'multiplied by'</li> </ul>            |
| Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( $\times$ ), division ( $\div$ ) and equals (=) signs | <p>2MD–1 Recognise repeated addition contexts, representing them with multiplication equations and calculating the product, within the 2, 5 and 10 multiplication tables.</p> <p>2MD–2 Relate grouping problems where the number of groups is unknown to multiplication equations with a missing</p> | <ul style="list-style-type: none"> <li>• Can write addition sentences as multiplication sentences and vice versa</li> <li>• Can when shown an array, write the 4 addition and multiplication sentences that the image represents and 2 division facts</li> </ul>  | <ul style="list-style-type: none"> <li>* Link repeated addition and 'multiplied by' number sentences</li> <li>*Use an array to show that multiplication can be done in any order (commutative law)</li> <li>* Divide by grouping and record using the <math>\div</math> symbol</li> <li>*Divide by sharing and record using the <math>\div</math> symbol</li> </ul> |

## Year 2 – Mathematics Intent

|   |  |  |   |
|---|--|--|---|
|   | factor, and to division equations (quotative division).  |  | *Compare division by grouping and division by sharing<br>*Related multiplication and division facts<br>*Solve problems involving multiplication and division, using mental methods, and multiplication and division facts |
| Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot   | TAF – Recall multiplication and division facts for 2, 5 and 10 and use them to solve simple problems, demonstrating an understanding of commutativity as necessary   | <ul style="list-style-type: none"> <li>• Can use an array to explain the commutative law e.g. <i>Why <math>2 \times 5</math> is the same as <math>5 \times 2</math>?</i></li> <li>• Can use an array to record the 2 division sentences that can be made from the image</li> <li>• Can explain why a division calculation cannot be done in any order e.g. <i>Why is <math>2 \div 10</math> not 5?</i></li> </ul>  |   |
| Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts | <p>2MD–2 Relate grouping problems where the number of groups is unknown to multiplication equations with a missing factor, and to division equations (quotative division).</p> <p>TAF – Recall multiplication and division facts for 2, 5 and 10 and use them to solve simple problems, demonstrating an understanding of commutativity as necessary</p> | <ul style="list-style-type: none"> <li>• Can use materials, arrays, repeated addition, mental methods, and multiplication and division facts to solve multiplication word problems in context</li> <li>• Can use materials, arrays, mental methods, and multiplication and division facts to solve sharing word problems in context</li> <li>• Can use materials, arrays, mental methods, and multiplication and division facts to solve grouping word problems in context</li> <li>• Can use materials, arrays, repeated addition, mental methods, and multiplication and division facts to solve multi-step problems involving multiplication and division in context</li> </ul> |   |

Year 2 – Mathematics Intent

| Block 5   |   |   |  |
|---|---|---|--|
| Fractions   |   |   |  |
| Substantive Knowledge   | Ready to Progress   | Key Performance Indicators  | Sequence of learning Detailed in Planning Overview   |
| National Curriculum   | Expected TAF Statements   |   |  |
| Recognise, find, name and write fractions $\frac{1}{3}, \frac{1}{4}, \frac{2}{4}, \frac{3}{4}$ of a length, shape, set of objects or quantity | TAF – Identify $\frac{1}{4}, \frac{1}{3}, \frac{1}{2}, \frac{2}{4}, \frac{3}{4}$ of a number or shape, and know that all parts must be equal parts of the whole | <ul style="list-style-type: none"> <li>• Can find unit fractions <math>\frac{1}{3}, \frac{1}{4}, \frac{1}{2}</math> of lengths, shapes or quantities by splitting into equal parts.</li> <li>• Can find non-unit fractions <math>\frac{2}{3}, \frac{2}{4}, \frac{3}{4}</math> of lengths, shapes or quantities by selecting more than one part after splitting equally</li> <li>• Can find unit fractions <math>\frac{1}{3}, \frac{1}{4}, \frac{1}{2}</math> of a set of objects by splitting into equal groups and make links to division</li> <li>• Can find non-unit fractions <math>\frac{2}{3}, \frac{2}{4}, \frac{3}{4}</math> of a set of objects by splitting equally then totalling the number of groups identified by looking at the numerator</li> </ul> | <ul style="list-style-type: none"> <li>*Recap Halves and Quarters</li> <li>*Introduce Fractions Notation <math>\frac{1}{2}</math> and <math>\frac{1}{4}</math></li> <li>*Find and Name Fraction One Third and Use Fractions Notation <math>\frac{1}{3}</math></li> <li>*Find and Name <math>\frac{1}{2}, \frac{1}{4}</math>, or <math>\frac{1}{3}</math> of a Set of Objects and Record as Sentences e.g. <math>\frac{1}{2}</math> of 8 = 4</li> <li>*Introduce Non-Unit Fractions <math>\frac{2}{3}, \frac{2}{4}</math> and <math>\frac{3}{4}</math> of an Object, Shape or Length</li> <li>*Find <math>\frac{2}{3}, \frac{2}{4}</math> and <math>\frac{3}{4}</math> of a Set of Objects</li> <li>*Fractions as Steps in the Counting Sequence and on Number Lines</li> <li>*Problem Solving</li> </ul> |
| Write simple fractions for example, $\frac{1}{2}$ of 6 = 3  |   | <ul style="list-style-type: none"> <li>• Can record fractions in writing and understand what each part represents</li> <li>• Can use a fraction as an operator on a number and record as a number sentence</li> <li>• Can calculate by dividing the number by the denominator and multiplying by the numerator</li> </ul>   |  |
| Recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$  |   | <ul style="list-style-type: none"> <li>• Count in fractions up to 10 and place on a number line</li> <li>• Use a number line to show that <math>\frac{1}{2}</math> is equivalent to <math>\frac{2}{4}</math></li> <li>• Reason about the equivalence of <math>\frac{1}{2}</math> and <math>\frac{2}{4}</math> using objects or images</li> </ul>  |  |

Year 2 – Mathematics Intent

| Block 6   |  |  |   |
|---|--|--|---|
| Geometry – Properties of Shape  |  |  |   |
| Substantive Knowledge   | Ready to Progress  | Key Performance Indicators   | Sequence of learning Detailed in Planning Overview  |
| National Curriculum   | Expected TAF Statements  |  |   |
| Identify and describe the properties of 2-D shapes, including the number of sides and lines symmetry in a vertical line | 2G-1 Use precise language to describe the properties of 2D and 3D shapes, and compare shapes by reasoning about similarities and differences in properties<br><br>TAF – Name and describe properties of 2-D and 3-D shapes, including number of sides, vertices, edges, faces and lines of symmetry. | <ul style="list-style-type: none"> <li>• Can identify the number of sides on a range of 2D shapes</li> <li>• Can identify the number of vertices on a range of 2D shapes</li> <li>• Can define a polygon as a shape with straight sides and identify whether a 2D shape is a polygon or not</li> <li>• Can identify shapes by counting the number of sides or vertices including knowing quadrilateral as the generic term for a 4-sided shape</li> <li>• Recognises irregular shapes and can reason about this e.g. knows that every 5 sided polygon is a pentagon.</li> <li>• Can distinguish a square and a rectangle as special quadrilaterals and explain which properties define them</li> <li>• Can identify lines of symmetry on 2-D shapes</li> </ul> | <ul style="list-style-type: none"> <li>* Introduction and recap of shape work from year 1</li> <li>* Name and describe properties of 2D shapes including sorting by those properties</li> <li>* Lines of symmetry</li> <li>* Name and describe properties of 3D shapes including sorting by those properties and identifying 2D shapes as faces on 3D shapes</li> <li>* Consolidation with further sorting and problem solving</li> </ul> |
| Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces                   |  | <ul style="list-style-type: none"> <li>• Can recognise and name 3-D shapes, including cuboids, prisms and cones</li> <li>• Can describe the properties of 3-D shapes, including number of faces, edges and vertices</li> </ul>   |   |
| Identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]     |  | <p>Can identify 2-D shapes on the surface of a 3-D shape, including:</p> <ul style="list-style-type: none"> <li>• A triangle on a pyramid</li> <li>• A square on a cube</li> <li>• A rectangle on a cuboid</li> <li>• A circle on a cylinder and cone</li> <li>• A triangle and rectangle on a triangular prism</li> </ul>   |   |
| Compare and sort common 2-D and 3-D shapes and everyday objects.  |  | <ul style="list-style-type: none"> <li>• Can sort and classify 2-D and 3-D shapes and everyday objects using a Venn diagram, according to their properties</li> <li>• Can sort and classify 2-D and 3-D shapes and everyday objects using a Carroll diagram</li> </ul>   |   |

Year 2 – Mathematics Intent

| Block 7  |  |   |  |
|--|--|---|--|
| Measure – Time   |  |   |  |
| Substantive Knowledge<br>National Curriculum   | Ready to Progress<br>Expected TAF Statements             | Key Performance Indicators  | Sequence of learning<br>Detailed in Planning Overview  |
| Compare and sequence intervals of time   |  | <ul style="list-style-type: none"> <li>• Can describe intervals of time in days</li> <li>• Can state the difference between time in days.</li> <li>• Can measure accurately in hours, seconds and minutes</li> <li>• Can add and subtract intervals to times on clocks</li> </ul> | <ul style="list-style-type: none"> <li>*Introduction &amp; recap of analogue clocks from Y1</li> <li>*Understand the term clockwise</li> <li>*o'clock &amp; half past with just the hour hand</li> <li>*Quarter past &amp; quarter to with just the hour hand</li> <li>*o'clock half past, quarter past and quarter to with just the minute hand (Measuring in fractions of an hour)</li> <li>*Telling the time on an analogue clock with both hands to the nearest 15 minutes (TAF expected)</li> <li>*Telling the time on an analogue clock with both hands to the nearest 5 minutes (NC objective)</li> </ul> |
| Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times | TAF – Read the time on a clock to the nearest 15 minutes | <ul style="list-style-type: none"> <li>• Can tell the time to quarter past the hour</li> <li>• Can tell the time to quarter to the hour</li> <li>• Can tell the time to the nearest 5 minutes</li> </ul>  | <ul style="list-style-type: none"> <li>*Know the number of minutes in an hour</li> <li>*Know the number of hours in a day</li> <li>*Compare and sequence units of time</li> <li>*Link telling the time with time durations</li> <li>*Compare and sequence intervals of time</li> </ul>   |
| Know the number of minutes in an hour and the number of hours in a day   |  | <ul style="list-style-type: none"> <li>• Know that there are 60 minutes in an hour</li> <li>• Know that there are 24 hours in a day</li> </ul>  | <ul style="list-style-type: none"> <li>*Know the number of minutes in an hour</li> <li>*Know the number of hours in a day</li> <li>*Compare and sequence units of time</li> <li>*Link telling the time with time durations</li> <li>*Compare and sequence intervals of time</li> </ul>   |

Year 2 – Mathematics Intent

| Block 8   |   |   |   |
|---|---|---|---|
| Statistics  |   |   |   |
| Substantive Knowledge   | Ready to Progress   | Key Performance Indicators  | Sequence of learning Detailed in Planning Overview  |
| National Curriculum   | Expected TAF Statements   |   |   |
| Interpret and construct simple pictograms, tally charts, block diagrams and simple tables                                 | <p>2NPV–2 Reason about the location of any two-digit number in the linear number system, including identifying the previous and next multiple of 10.</p> <p>TAF – Read scales* in divisions of ones, twos, fives and tens</p> | <ul style="list-style-type: none"> <li>• Can generate data in everyday situations e.g. <i>How many children eat dinner or packed lunch?</i></li> <li>• Can present data in different ways using a scale of 1, 2, 5 or 10</li> <li>• Can answer retrieval questions from the charts and graphs that they are working with</li> </ul> | <p>*Introduction – key vocab</p> <p>* Interpret and construct simple tally charts and ask and answer questions about the data</p> <p>*Interpret and construct simple tables and ask and answer questions about the data</p> |
| Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity |   | <ul style="list-style-type: none"> <li>• Can answer questions about the data that they have collected using scales of 1, 2, 5 and 10 e.g. <i>which is the most popular chocolate bar when a full chocolate bar represents 2 people on a pictogram?</i></li> </ul>   | <p>*Interpret and construct simple pictograms and ask and answer questions about the data</p>   |
| Ask and answer questions about totalling and comparing categorical data.  | <p>2AS–1 Add and subtract across 10</p> <p>2AS–2 Recognise the subtraction structure of ‘difference’ and answer questions of the form, “How many more...?”.</p>   | <ul style="list-style-type: none"> <li>• Can find the total of two categories on a pictogram, tally, block diagram and simple table</li> <li>• Can find the difference between two categories on a pictogram, tally, block diagram and simple table to answer How many more...? How many fewer...? questions</li> </ul>             | <p>*Interpret and construct simple block diagrams and ask and answer questions about the data</p> <p>*Consolidation – ask and answer questions about a variety of different representations</p>                             |

Year 2 – Mathematics Intent

| Block 9  |                         |   |  |
|--|-------------------------|---|--|
| Geometry – Position and Direction  |                         |   |  |
| Substantive Knowledge  | Ready to Progress       | Key Performance Indicators  | Sequence of learning Detailed in Planning Overview   |
| National Curriculum  | Expected TAF Statements |   |  |
| Order and arrange combinations of mathematical objects in patterns and sequences   |                         | <ul style="list-style-type: none"> <li>• Can continue and create patterns of shapes, including those in different orientations.</li> <li>• Can identify the unit of repeat</li> </ul>   | <p>*Describe position (in, on, under, in front of, behind, in between, next to, on the left of, on the right of, above, below)</p>   |
| Use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise). |                         | <ul style="list-style-type: none"> <li>• Confidently uses and understands terms, forwards, backwards, left and right, up and down to describe routes on a grid</li> <li>• Can recognise when an image has been rotated a whole, half, quarter or three-quarter turn</li> <li>• Can rotate themselves or an object clockwise or anti-clockwise</li> <li>• Can program robots using instructions given in right angles</li> </ul> | <p>*Describe direction and movement without turns (forwards, backwards, left, right, up, down)</p> <p>*Describe rotation as turns (whole, half quarter and three quarter turns clockwise and anti-clockwise)</p> <p>*Describe rotation in terms of right angles</p> <p>*Describe direction and movement including using a range of vocabulary to describe turns</p> <p>*Order and arrange combinations of mathematical objects in patterns and sequences</p> |

Year 2 – Mathematics Intent

| Block 10   |   |  |   |
|--|---|--|---|
| Measures – Length, Height, Mass, Capacity & temperature  |   |  |   |
| Substantive Knowledge<br><br>National Curriculum   | Ready to Progress<br><br>Expected TAF Statements  | Key Performance Indicators   | Sequence of learning<br><br>Detailed in Planning Overview   |
| Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels | <p>2NPV–2 Reason about the location of any two-digit number in the linear number system, including identifying the previous and next multiple of 10.</p> <p>TAF – Read scales* in divisions of ones, twos, fives and tens</p> | <ul style="list-style-type: none"> <li>• Can make sensible estimations in relation to all areas of measure</li> <li>• Can measure accurately in centimetres and metres using rulers and metre sticks</li> <li>• Can record measures using correct abbreviations cm and m</li> <li>• Can measure accurately in grams and kilograms using measuring scales</li> <li>• Can record measures using correct abbreviations g and kg</li> <li>• Can measure accurately in millilitres and litres using measuring vessels</li> <li>• Can record measures using correct abbreviations ml and l</li> <li>• Can measure accurately in degrees Celsius</li> <li>• Can record measures using correct abbreviations °C</li> <li>• Can measure accurately in hours, seconds and minutes</li> <li>• Can decide the correct unit of measure to use in a given situation e.g. <i>What unit of measure would we use to measure the mass of an apple?</i></li> <li>• Can decide on the appropriate measuring tool to use in a given situation e.g. <i>what would you use to see how much water is in this cup?</i></li> </ul> | <ul style="list-style-type: none"> <li>*Introduction – choosing sensible units and equipment</li> <li>*Number lines recap</li> <li>*Choose and use appropriate standard units to estimate and measure length /height in any direction (m/cm) to the nearest appropriate unit, using rulers</li> <li>*Compare and order lengths</li> <li>*Choose and use appropriate standard units to estimate and measure capacity (litres/ml) to the nearest appropriate unit, using measuring vessels</li> <li>*Compare and order volume/capacity</li> <li>*Choose and use appropriate standard units to estimate and measure mass (kg/g) using scales</li> <li>*Compare and order mass</li> <li>*Choose and use appropriate standard units to estimate and measure temperature (°C) to the nearest appropriate unit, using thermometers</li> <li>*Compare and order temperature</li> <li>*Solve problems with addition and subtraction</li> </ul> |
| Compare and order lengths, mass, volume/capacity and record the results using >, < and =   |   | <ul style="list-style-type: none"> <li>• Can compare and order different units of measure</li> <li>• Can use &lt; &gt; and = to record comparisons</li> </ul>  |   |

## Year 2 – Mathematics Intent

|  |  |  |   |
|--|--|--|---|
|  |  |  | <p>using concrete objects and pictorial representations, including those involving numbers, quantities and measures</p> <p>*Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts</p> |
|--|--|--|---|
